The commands:

The result:

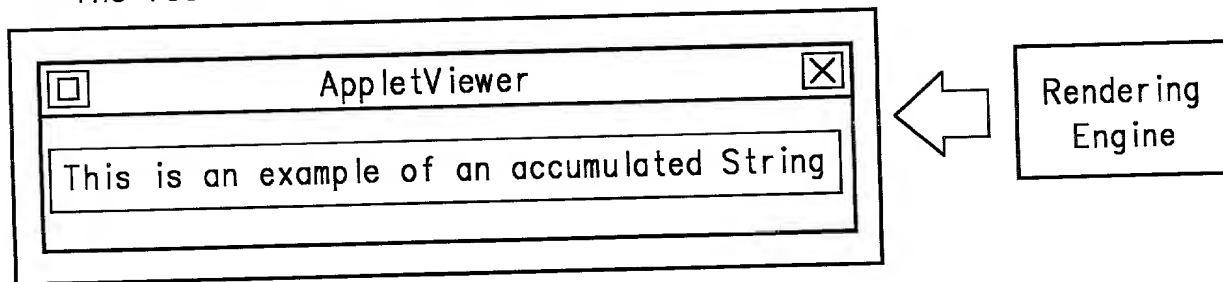

FIG. 14

Painting Methods:

clearRect
clipRect
copyArea
draw3DRect
drawArc
drawLine
drawOval
drawPolygon

drawRect
drawRoundRect
fill3DRect
fillArc
fillOval
fillPolygon
fillRect
fillRoundRect

Other Methods:

drawImage
drawString
setColor

setFont
setPaintMode
translate

Windowing/View System

82

General Graphics Controller

- Creates Frames (i.e. windows)
- Creates Components (i.e. views)
- Passes image data to Image Renderer
- Passes text to Font Renderer
- Passes shapes to Polygon Renderer
- Allows selection (focus) for frames and components
- Deletes frames and components physically from display
- Traverses object hierarchy when a paint method in a view is called
- Handles mouse and keyboard events "passing" them down through a chain of frames and components

254

Window Manager

- Draws windows using polygon draws in the Polygon Renderer
- Manages windows so they can overlap
- Determines frames that event occurred in and notifies appropriate layout manager instance that it may need to update
- Oversees container hierarchies within each frame

256

Layout Manager (belongs to / is referenced by a frame)

- Manages container hierarchies within a frame's scope
- Determines container that event occurred in and tells it to update if necessary

258

Component Manager (belongs to/is referenced by a LayoutManager/Container)

- Manages component hierarchies within a container's scope
- Determines component that event occurred in and tells it to update if necessary
